

Valerio Italiano

UX Designer

UX lead with 20 years of experience bridging business strategy and user needs. I create product frameworks, prototypes, and design systems that scale globally and deliver measurable impact for both users and brands.

Professional experience

Staff UX Designer

Google

2021—2025

Defined the product vision and unified design framework for Google Ads' measurement setup, aligning Google Analytics and Google Marketing Platform to deliver cohesive advertiser workflows and measurable adoption gains.

PROJECTS

Unified Measurement
Experience

Conversion Setup Simplification

- Defined product vision for the redesign of the entire measurement setup experience, working cross-functionally to unify over a dozen flows and delivering one framework driving a 7.89% uplift in goal activation.
- Streamlined web conversion setup in Google Ads, enabling advertisers to configure web conversions directly in the UI with no code changes.

Senior UX Designer

Google

2015—2020

Shaped the campaign creation and creative management experiences in Google Ads, building frameworks and shared components that scaled across campaign types and streamlined creative asset workflows.

PROJECTS

Campaign Creation Frameworks
Setup Flows for Search,
Display and Performance Max
Campaigns
Creative Management

- Designed the setup experience for flagship campaigns, like Google Search campaigns (driving a +6% improvement in campaign completion and an +8.32% increase in total spend) as well as then-new Performance Max campaigns.
- Designed the framework used for all Google Ads campaign flows.
- Led the design of in-product experiences for managing multimedia ad formats, delivering consistent experiences across campaign types.
- Created shared "Media Picker" component used to select 300,000 assets/day across all campaign and ad types.
- Designed a scalable ad preview framework supporting dozens of ad types across Google Ads driving consistency across the ecosystem.

UX Designer

UK Home Office / GDS

2014—2015

Worked with the ministerial department responsible for immigration, policing, counter-terrorism, and border security during the UK government's digital transformation initiative to bring all major public services online.

PROJECTS

Online Crime Reporting
Border Security (classified)

- Designed and conducted research for an online crime reporting system.
- Launched a live pilot in partnership with two UK police forces.
- Contributed to the development of security systems deployed at the UK border.

Senior UX Designer

British Sky Broadcasting

2011—2014

PROJECTS:

Account Management App
TV Content Discovery
Online Store
Home Move Online

Worked for Britain's largest commercial broadcaster and provider of satellite, broadband and telephony services on a range of projects across the online store and products area, customer account management and TV content discovery.

- Led UX design for the Sky Service app launch, addressing high-volume customer service requests and reducing call center load through self-serve flows. Reached #1 free app on App Store in 2014.
- Designed the Find & Watch section on Sky.com, helping millions of subscribers discover current and upcoming TV and film content.
- Contributed to key projects across Sky's online store, optimizing sign-up and service transfer flows to drive broadband and TV subscriptions.

UX Consultant

Freelance

2010—2011

PROJECTS

Taxi Comparison Service
Social Network Concept
Private Club Members' Portal

Worked independently and in collaboration with agencies to deliver end-to-end design solutions for a range of clients and sectors.

- Partnered directly with clients and agency teams to define and deliver digital services.
- Led workshops to gather requirements, align stakeholders, and shape design direction.
- Created service concepts from idea to launch, collaborating with cross-functional teams.
- Delivered user flows, wireframes, and high-fidelity visual designs across platforms.

Interaction Designer

eFinancialCareers.com / Dice.com

2004—2008

Led the UX design across the entire eFinancialCareers platform, shaping end-to-end experiences for both jobseekers and recruiters.

- Responsible for all interaction design across a global network of career sites.
- Delivered user-centered solutions to support job discovery, application flows, and recruiter tools.
- Awarded Best Online Service in 2005 by Recruiter Magazine.
